## SUMMARY

---

- **Software Engineer:** A highly skilled and experienced Marine Corps veteran has a demonstrated history of success in designing, developing, and modifying software applications.
- **Experienced Leader:** Leadership course experience in Marine Corps Radio Operations and Infantry Training Battalion.
- **Strong Learner:** Their exceptional ability to think conceptually, creatively, and critically, coupled with strong decision-making, judgement, and reasoning skills, allows them to excel in diverse organizational and team settings.

## EXPERIENCE

---

### FISERV

June 2023-

Present

#### Software Engineer Tech Analyst II, Alpharetta, GA

- Utilized Agile methodologies, and SCRUM working in sprints to deliver incremental functionality while connecting with cross-functional teams to gain insight on features and issues as well as attend Daily Stand-up meetings.
- Maintain and enhance existing microservices within a Maven project, focusing on optimization, issue resolution, and the integration of new features using Java Spring Boot and J2EE. Utilize GitLab as the repository and leverage its CI/CD pipelines.
- JUnit Testing to maintain code integrity after resolving issues or implementing new features.
- Participated in stand-up meetings, sprint planning sessions, and retrospectives for effective communication and goal alignment.
- Address and resolve bugs and issues, and develop features as assigned by the Project Manager, utilizing Jira and Confluence for issue management and progress tracking.

### 121G

Sep 2020 – Feb 2023

#### Software Developer Intern, Carrollton, GA

- Provide expertise in software development to enhance software offerings for internal and external clients, adhering to established protocols and certifications like HEPA compliance.
- Participate in Daily Stand-Up meetings, utilizing Agile Methodologies/SCRUM to ensure functional product delivery at the end of each sprint, and maintain open communication with product owners to address issues and discuss desired features.

- Utilize JIRA for quality assurance, tracking issues, and managing features, while designing and implementing user interface features and additional functionality using React.js, Angular, TypeScript, HTML, JavaScript, and CSS.
- Develop AWS Lambda functions to retrieve data from SQL databases, collaborate with database administrators to establish relationships, leverage C# for automation, SQL commands and Excel for functionality enhancement, and architect foundational frameworks for applications, utilizing Team Explorer in Visual Studio for version control.
- Developed React.js components that minimized redundancy and enhanced modifiability, resulting in a 20% reduction in production time.
- Utilize GitLab as the repository and leverage its CI/CD pipelines.

## **BarMinder**

Sep 2020 - Mar 2021

### **Software Developer Intern, Carrollton, GA**

- Designed and developed interactive components and features using React-Native, optimizing performance through code refactoring and cleaning.
- Addressed and resolved bugs and issues, and developed features as assigned by the Project Manager, utilizing Jira and Confluence for issue management and progress tracking.
- Adhered to Agile software development methodology in a startup environment, gaining experience in the SDLC (Software Development Life Cycle).
- Expanded technical skill-set by developing mobile apps with Android Studio, while continuously researching and expanding knowledge of the current platform.

## **EDUCATION**

---

### **UNIVERSITY OF WEST GEORGIA, Carrollton Ga**

#### **Bachelor of Science - Computer Science**

## **ADDITIONAL INFORMATION**

- 
- Technical Skills: Java, C#, Python, Object-Oriented Programming (OOP), TCP/IP, MySQL, SQL, Git, Rest API, MySQL, SQL, Git, GitLab

### **United States Marine Corps Infantry-Man/Radio operator**

Oct 2010 – Oct 2018

- Recognized with the National Security Medal and Good-Standing Medal for exceptional service.
- Led a class of over 70 students at Infantry Training School and Radio Operations School, demonstrating effective instructional and leadership skills.
- Communicated effectively with members of the battalion to coordinate work assignments and achieve objectives.
